REQUIRED PRE-INSPECTION PREPARATIONS

1. For occupied home, water must run from the sample faucet for 1 hour prior to sampling.
2. For unoccupied home, water must be run from the sample faucet for 24 hours prior to sampling.
3. Water well casing and components within the home must be visually accessible.
4. Must have septic tank and other treatment tank covers located and unearthed or unlocked prior to inspection arrival.
5. Property owner is responsible for ensuring that all components being inspected are adequately located and made visually accessible for inspection. Upon request we can assist in contracting for earth moving and or locating services.

NOTE: PLEASE ENCLOSE (OR USE THE BACK OF THIS SHEET)

1. A ROAD MAP TO SITE
2. SITE MAP TO INCLUDE LOCATIONS OF SEPTIC & WELL IF KNOWN

DISCLAIMER: (PLEASE READ AND SIGN BELOW)

We do not express any guarantees to the life of the septic and or water supply systems or any of their respective components. This report consists of an inspection of the visible components and their condition on the date of the inspection. This is not an evaluation of soil conditions as they apply to state or local codes in regards to private sewage systems. This report does not verify the systems suitability for additions to the residence or habitable buildings. Additions to building may cause an adverse affect on the function of the systems. If efforts have been made to conceal a problem we may not be able to detect a problem. If a system has not been used recently, we may not be able to detect a problem.

PROPERTY OWNER'S SIGNATURE: _____ DATE: _____

HOME OWNER QUESTIONNAIRE MUST BE COMPLETED AND SIGNED BY THE HOME OWNER PRIOR TO INSPECTION. SEE PAGE 2 OF 2 FOR QUESTIONNAIRE.

* PUMPING FOR 1000 GALLON IS ABOUT \$130.00
